

# CARGO TANKS WITH MULTIPLE COMPARTMENTS

## Options for displaying flammable placards on compartmented cargo tanks

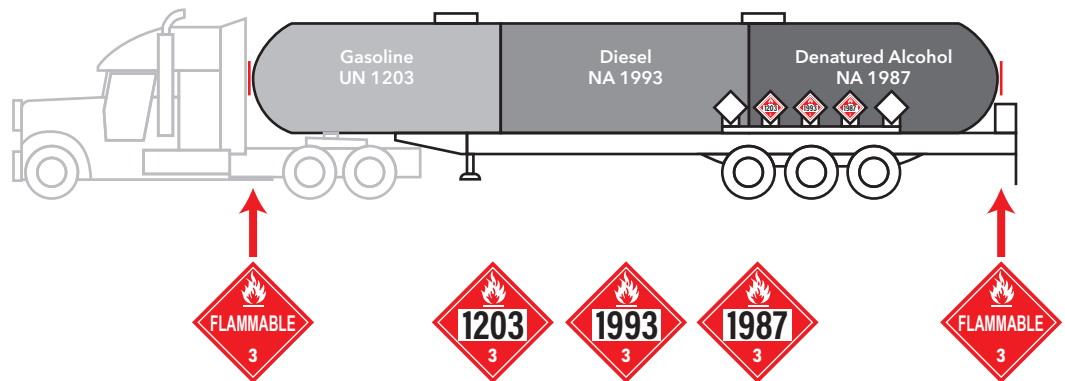

### Option 1:

Display placards and ID numbers on all four sides.

### Option 2: Utilize exceptions provided 172.336(c):

Display the placards and ID numbers on both sides of the trailer in the order in which they are contained in the compartments; a Class 3 placard would be displayed on the front and the rear of the cargo tank.

### Option 3: Display using exception in 172.336(c):

Display the placard and ID number of the lowest flashpoint petroleum distillate fuel on all four sides. If the tank also contains gasoline and alcohol fuel blends consisting of more than 10% ethanol, the ID number "3475" or "1987" as appropriate must also be displayed.
