

LABELING

Labeling Requirements on Hazardous Materials Packaging

Labels placed on a package of hazardous materials must be clearly visible. Each label must be printed on or affixed to a background of contrasting color, or must have a dotted or solid line outer border.

Labels must be located on the same surface of the package as the proper shipping name marking and it must be near the proper shipping name marking.

When primary and subsidiary labels are required they must be displayed next to each other, within 6 inches of one another.

If a package is very small, a label may be printed on or placed on a securely affixed tag and attached to the package.

Labels must not be placed on the bottom of a package.
